DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-7, and 9-31 are rejected under 35 U.S.C. 102(e) as being anticipated by Henry (6,526,292).

As to claim 1, Henry teaches a telephone (10) comprising,

A microphone (12) for receiving voice commands where the voice command includes alphabetical character (60);

A memory (28) for storing plurality of voice commands; and

A control module (24) coupled to the microphone and the memory, where the control module is configured to map the voice commands with the numeric digits (Fig.3).

As to claims 2-6 and 10-11 Henry teaches a voice recognition program, a keypad, a transceiver and a speaker (24, 16, 20, 14).

With respect to claim 7, Henry teaches where "FIG. 1 depicts schematically a telephone 10 which preferably is portable or otherwise located in a mobile environment like a vehicle."

Art Unit: 2655

As to claim 9, there is (a wire link) between the user interface and the telephone (22).

Claims 12-31 are analogous to the claims addressed above and are rejected by Henry for the foregoing reasons.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Henry.

With respect to claim 8, a link is shown between the user interface and the telephone (22), but it doesn't explicitly say it is a wireless link.

Official Notice is taken that user interface and communication device having a wireless link such as cordless phones, are common and would be obvious in Henry's teaching for giving the user the opportunity to move freely while making calls.
